

Let drivers drive. We'll handle the rest.

3rd Eye® Complete Fleet Management Solutions

Innovative solutions to help drive fleet safety, productivity, profitability, and maintenance.

The Challenges

Today's fleets are incredibly complex. In order to be successful, it is imperative that all the information needed to effectively manage drivers, vehicles, equipment, safety, fleet operations, and accounting, be easily available, accurate, and require minimal manual input from operators.

Historically, obtaining this level of information requires multiple, incompatible systems, all barely fitting together in a complex cog-work of confusion.

The Solution

3rd Eye provides a powerful suite of “out-of-the-box” solutions, that passively collect the information needed, without requiring manual operator action.

Our incredibly simple-to-use suite of tools provide fleets with the ability to easily meet complex requirements such as: ensuring driver best practices, vehicle and equipment efficiency, fleet management, government policy compliance, and so much more!

It's all part of the industry-changing Connected Collections® digital strategy, helping fleets to make better decisions faster.

Value Overview

- Predictive maintenance alerts
- Passive capturing of your team's successful service
- Full 360 video coverage inside and out
- Intuitive user interface
- Dynamic reporting and data analysis
- Customizable data feeds and sharing
- Continuous video analysis for operations and safety
- Automated long term data storage and risk mitigation
- Powerful partner community with integrated solutions

Magnif-Eye®

Safety

With cameras continuously recording what the driver sees (and doesn't see), 3rd Eye provides continuous monitoring of your fleet. View live feeds and on-demand video for the ultimate in safety and liability protection.

- 360 Degree Camera Coverage with non-stop recording
- Chronological accident liability with on-demand video requests and automated triggers
- Coach, educate, and develop operators
- View in near real time with live streaming

Verif-Eye®

Operations

Passively capture proof-of-service with data including video and/or photo documentation. Quickly pull on-demand video for service complications to ensure continuous operation efficacy.

- Passively capture your drivers servicing your end-users
- Have each end-user service reviewed per your requirements
- Associate service to your end-users
- Actively identify incomplete service
- Simple tablet integration for automated processing
- Integrated options for Enterprise Resource Planning (ERP) management

Optim-Eyes®

Maintenance

Automatically monitor your fleet and equipment, with the ability to proactively predict when service and repairs are best required. Reduce breakdown potential by having work orders automatically created in your systems.

- Continuous engine diagnostic maintenance monitoring
- Heil® exclusive body cortex controller analysis
- Predictive alerting and work order generation
- Prescriptive guidance for each maintenance scenario

Certif-Eye®

Accounting

Passively track asset utilization such as: location, fuel usage, engine hours, and miles driven. Key information required for various Department of Transportation (DOT) compliance and taxation benefits is right at your fingertips!

- Easily file International Fuel Tax Agreement (IFTA) taxation reporting
- Fuel Excise tax recovery details for filing study compliance
- Understand asset utilization for Driver Vehicle Inspection Report (DVIR) requirements
- Analyze and monitor your operational utilization
