

Automated solutions to simplify fuel & IFTA TAX REPORTING AND FILING

Let drivers drive. We'll handle the rest.

Certif-Eye

Innovative automated solutions to simplify
Fuel Tax and IFTA Tax filing and reporting.

The Challenges

Being compliant can be a tedious process, and collecting all the necessary information to feel confident can be nerve-racking. Knowing which forms to complete, what's required for successful filing, and finding the right partner to guide you through can be a daunting task. Additionally, you must ensure that your data is accurate and traceable, which adds another layer of complexity. Different governmental bodies have unique requirements, leading to differences in the same process based solely on location.

A worst-case scenario for your business would be getting audited without having the necessary paper trail to show your compliance. Fortunately, Certif-Eye® from 3rd Eye® Digital can save the day by managing all of your data and converting it into the required information.

The Solution

Certif-Eye simplifies information management. Our intelligent system tracks vehicle utilization, ensuring accurate data storage and logging. By capturing critical information from the vehicle messaging network, we translate it into actionable insights for your business, enabling faster and better-informed decisions.

We extract valuable information such as your vehicle's location history, fuel consumption, operating hours, and mileage. These details serve various contractual obligations and business processes. By utilizing our solutions, your drivers can concentrate on operating their equipment instead of administrative tasks and bureaucracy.

Taxation can be a complex matter, particularly when it comes to deciphering the necessary forms for filing IFTA or Excise Tax recovery. It can be even more challenging to find the right business partner for your needs. At 3rd Eye, we aim to ease the burden by providing you with the information needed to help file your IFTA forms. When you collaborate with the right partners, 3rd Eye optimizes your data needs for taxation filing.

We can provide your road usage information to assist in meeting contractual requirements, and achieving success. With Certif-Eye as the tool and 3rd Eye as your partner, success isn't an option, it's a guarantee.

Value Overview

- Auditable data with customized data storage plans
- Variable information sharing models for ease of data access
- Partner recommendations for taxation filing and compliance
- Near real-time data access for on-demand viewing
- Optimize operational standards and practices
- Understand asset utilization and monitoring
