3rd Eye Fleet Health & Maintenance

Passively Monitor Chassis, Body, and Equipment Health and Simplify Fleet Maintenance Processes

The Challenges

Even with the best mechanics and maintenance practices, unforeseen issues can slip through the cracks, creating costly downtime and maintenance issues that decrease productivity, increase expenses, and create customer service challenges.

To achieve operational success, fleet managers need seamless access to accurate, real-time data across every facet of their business—drivers, vehicles, equipment, safety, fleet operations, and accounting. This data must not only be readily available but also require minimal manual input from operators, allowing them to focus on higher-level tasks.

Historically, accessing this kind of comprehensive insight meant relying on multiple incompatible systems, which barely connected, lead to inefficiency and operational confusion. 3rd Eye revolutionizes fleet management by offering an integrated solution that streamlines operations, ensuring that the information you need is always at your fingertips.

The Solution

3rd Eye's AI technology revolutionizes fleet maintenance by continuously monitoring thousands of chassis and body data points, providing real-time alerts to potential issues **before** they escalate into major problems. It's like having a personal doctor for each vehicle, ensuring your fleet remains healthy, on route, and ready to perform.

Eye-Site Fleet Maintenance significantly simplifies vehicle, body, and equipment management by offering a prioritized list of maintenance and repair tasks based on severity and time until failure. This proactive approach helps your maintenance team address issues early, keeping your fleet in optimal operating condition.

Mechanics are provided with full, detailed repair instructions, minimizing diagnostic errors and significantly improving vehicle uptime. With step-by-step guidance, even less-experienced technicians can handle tasks that traditionally required senior staff to perform.

Heil-specific body alerting integrates seamlessly with 3rd Eye, processing data from the Heil controller system to generate timely maintenance alerts, providing unparalleled insights into body health. With clear instructions and easy access to Heil support, maintaining your refuse collection fleet has never been easier.

Value Overview

- ✓ Predict issues before they occur
- ✓ Reduce down time/need for spares
- ✓ Receive detailed maintenance requirements
- ✓ Improve maintenance processes
- ✓ Optimize work order handling and execution

Designed For

CONCRETE

CONSTRUCTION

CRANES/EQUIP

DISTRIBUTION

SCHOOL TRANSPORT

EMERGENCY RESPONSE

FOOD / BEV.

MOBILE SERVICE

OIL / GAS

PUBLIC TRANSIT

PUBLIC WORKS

REFUSE

TRANSPORTATION

UTILITY

Let drivers drive. We'll handle the rest.
