**ENSURE
ACCURATE FILING**

**IDENTIFY RECOVERY
OPPORTUNITIES**

**ELIMINATE
MANUAL LOGS**

**PROVIDE
AUDIT SUPPORT**

**MAINTAIN REGULATORY
COMPLIANCE**

Giving fleets the tools needed for accurate fuel excise tax compliance.

3rd Eye's fuel tax reporting and excise tax compliance tools provide clear, verifiable insight into how fuel is used across fleet operations. By capturing detailed fuel utilization data tied to vehicle activity and location, fleets can accurately separate taxable and non taxable usage, support compliant filings, identify recovery opportunities, and maintain audit readiness with confidence.

3RD EYE®

3rd Eye Digitally Connected Technology

Improve fuel tax accuracy and compliance through digitally connected fleet data.

The Challenges

Submitting Form 720 Federal Excise Tax returns is complex and unforgiving. These multi-page filings require precise, defensible data, and errors often lead to penalties, delays, or costly outside support that impacts your bottom line. Manual logs and estimates make it difficult to document fuel usage accurately, especially across large or geographically dispersed fleets.

Federal fuel taxes are intended to fund public infrastructure, but many fleets operate extensively on private or customer-owned property. In those cases, fuel used off public roads is often not taxable, yet many fleets continue to overpay due to a lack of accurate, auditable data and clear visibility into where fuel is actually consumed.

That is where 3rd Eye Digital helps bring clarity, accuracy, and confidence to fuel tax reporting and compliance.

The Solution

The 3rd Eye Digital fuel tax and excise tax reporting solution simplifies one of the most complex and error-prone areas of fleet compliance. By automatically capturing vehicle location, operating activity, and fuel usage data, the system eliminates manual logs, driver input, and assumptions that often lead to overpayment or compliance risk.

Using precise GPS and vehicle data, 3rd Eye accurately distinguishes fuel used on public roadways from fuel consumed on private or customer-owned property. This creates a clear, defensible record of taxable and non-taxable fuel use, supporting accurate Form 720 reporting and helping fleets identify legitimate excise tax exemptions and recovery opportunities.

All data is securely stored and easily accessible, providing fleet managers with audit-ready documentation backed by real operational evidence. The result is faster reporting, improved accuracy, reduced reliance on outside professionals, and greater confidence that fuel taxes are calculated correctly.

By turning everyday fleet data into compliant, defensible fuel tax records, 3rd Eye helps fleets reduce unnecessary tax expense while maintaining confidence in their reporting and regulatory compliance.

Value Overview

- ✓ Automated fuel and location data
- ✓ Audit-ready documentation
- ✓ Accurate fuel utilization insight
- ✓ Public and private fuel separation
- ✓ Eliminates manual logs
- ✓ Excise tax compliance and recovery
- ✓ Simplified Form 720 reporting
- ✓ Near real-time fuel usage visibility
- ✓ Confidence during DOT audits

Designed For

Let drivers drive. We'll handle the rest.
